Dock
 9 in 1 (SD Card, MultimediaCard, xD-Picture Card, MMCplus, SDIO, SDXC Card)
 High-Def displays are the flavour of the moment, but the Dell Precision M4800 marks the first time we've seen such a screen on a business-class machine. That's not the monster of a workstation laptop we're only talking about. Not only is it a 15.6in panel Super Crisp, UltraSharp FHD(1920x1080) it's also one of the finest-quality displays we've tested.

Itâ€™s a glorious display, suitable for everything from professional photo editing and magazine layout, to 3D design and high-end video production. Coupled with a matte, anti-glare coating, itâ€™s readable in most conditions, too.

Battery Excellent

Laptop in mint condition â€” Like new â€” 10 out of 10
