Solar Panel heating is the most cost effective and safest way to heat your pool. The solar panels unique design uses maximum efficiency from the sun and is usually installed on nearby north-facing roof and connected in-line with the pool's pump and filtration system. The swimming pool's water is then circulated through the solar panels collecting the heat from the sun's rays and transferring it back to your swimming pool. For each 10,000 litres of water you should install one solar panel to get approximately 0-1°C increase in your water temperature. Our solar panels are highly effective in transferring the heat collected from the sun to your pool.

anybody can afford to have a warm comfortable swimming pool all year long.

### Benefits of Solar Panels

- Extended swimming season from August -May
- Water temperature increases up to 40%-60%
- Installed in line with your existing pool pump.
- No additional electrical costs.
- Durable and high quality materials guaranteed
- No need to ever change the panels.

Location **Gauteng, Midrand**
