2013 BMW SS1000R HP4 competition pack K-Series

THE BEST OF THE BEST. For riders not content with race track performance alone, there is the HP4 with Competition Package. With its additional HP components it makes a striking impression: HP brake lever, HP clutch lever and HP rider footrest system. The long, closed HP engine spoiler, the HP plate holder and the HP fuel tank trim are made entirely of carbon. Its most conspicuous hallmarks are the aluminium forged wheels in Racing blue and the sponsor sticker kit - so its unique quality lies not just in its performance but in its design, too, making it a perfect synthesis of quality that is impossible to miss. The HP4 Competition also has the consecutively numbered fork bridge engraving with HP logo. This makes each and every machine a unique specimen. Due to the involved manufacturing process and the limited availability of the high-quality carbon components, only a few models can be made during the manufacturing phase up to 2014. The new HP4 with Competition Package option: uniquely exclusive.
