Selling my Alfa GT Junior with LSD diff

Alfa original motor was giving me continuous problems, had it with a lot off Alfa specialists and the end result to open motor.

So I opted to install the fantastic Alfa 2.5 V6 12valve fuel injected motor.

The build just started and builder I used went bankrupt, so I do not have a workshop setup at home and Mother in law just moved in and space is no more.

So here is what you are getting for your buck:

Complete Alfa except motor and radiator

Tyres almost new

LSD diff

Extra chrome trimmings and various parts - pics

License still up to date until 31-08-2017

Complete Alfa 2.5 V6 12valve fuel injected motor mated to original gearbox with clutch and new mod parts.

Include one extra original gearbox untouched

Complete sub assembly recon & balanced completely by Allan Y Brink Engineering (new rings, mains, big ends sleeves redone)

One extra sub assembly for fitting unit first

Cylinder heads complete needs maybe valve seals

Extra cylinder heads

Alfa 2.5 V6 12valve fuel injected motor

Take a look at pics to get a view and make an offer for the whole lot
 or come back to the seller to just motor and radiator.
