Android™ Music Playback via USB
 (AUTO MODE/AUDIO MODE)

Simply connect your Android smartphone or tablet to the receiver via USB and enjoy a totally "plug and play" music playback solution. The Android Open Accessory Protocol (AOA2) is supported so absolutely no preparation or set-up is necessary – just plug it in and it's ready to play audio files stored on your Android device in what's called "AUDIO MODE". Or, by installing the free JVC Music Play app* available on Google Play, you'll be able to access "AUTO MODE" for added functionality including Folder Up & Down, and Search Artist/Album/Song.
