Mini Quadband GSM Voice Activated Spy Bug Listening Device

Are your kids safe online?
 Is your spouse cheating on you?
 Is your family hiding things behind you?
 What people actually got in their head?

Easy to use

Just Insert a GSM SIM card into the slot and put the audio bug in a hidden place, then dial the sim card number to monitor your target, you will hear the audio around the bug

Bug will automatically dial your phone when it hears any sound over 45db
 It can be used for remote monitoring, home surveillance, automotive anti-theft tracking, child custody

This two way GSM audio spy device calls you when it detects sounds around its vicinity. How awesome is that? Simply insert a GSM SIM card and program it to your desired phone number for call back and now you're in the spy business!

Trying to find out the truth about what's being said behind your back? Now you can from a distance. You

can even place several of these spy audio devices and set them up at your desired locations like the living room, dining room, office room, etc. Just insert a GSM SIM card into the audio spy device and it will be active and ready for action.
