Alpine CDE-178BT Mp3 with USB & Bluetooth

The CDE-178BT combines all the cool new features and functions such as Tunelt compatibility for iPhone and Android based phones, allowing full sound tuning and sharing via your phone, as well as new Facebook message alerts. It is also compatible with the vTuner for Alpine iPhone app, giving you thousands of internet radio stations with control from your Head Unit. BassEngine Pro means top quality sound with a 24-Bit DAC and the high resolution display ensures best visibility in any lighting conditions. It's Steering Wheel Remote Control Ready and Vehicle Display Interface Ready, for a perfect install in almost any vehicle. If your car is equipped with a start-stop engine, this Head Unit is even more interesting for you, since it will keep playing when your engine stops at a crossroad.

Tune Your Sound, Check Your Facebook

Download the Tunelt smartphone app, then connect your iPhone via USB or Android based smartphone via Bluetooth. Now you're ready to use your phone as a handy interface to achieve exactly the sound you want in your car. If you're on Facebook, the app will also notify you of new messages on both your phone and the head unit. For more details, see the Tunelt App description in the Apps product category.
