Gold Definition | CopperMetal And Diamonds +27781701667 The Statue of Liberty and other art objects are often made of copper materials because of their durability. Copper and copper alloys are used to transport electricity to and in our homes and businesses. Copper is the primary electrical conductor for appliances and electronics. It is used in durable and decorative applications such as copper roofing, door hardware, railings and decorative trim. It is used in our cars and airplanes and in our plumbing systems. During production of shaped copper materials, various other metals are added to give copper additional properties. These alloying elements add strength, ductility, durability, corrosion protection and other properties.
